

Vehicle cleaning instructions

A clean work vehicle promotes a healthy environment. You have a role in keeping your vehicle clean.

If you share a work vehicle with others, you should sanitize the high-touch areas every time you take over the vehicle, especially during flu season.

Follow these three easy steps:

1. Use a disposable disinfectant cloth to wipe down the following:
 - Steering wheel
 - Seatbelt clasp
 - Door handles
 - Other areas that are commonly touched.
2. Carefully dispose of the cloth immediately after use.
